

Irma Elks' Barbecue & Picnic, Sunday, July 10, 1 p.m.

(4 Miles North of Irma on Mannville Road)

TB X-Ray Clinic Will be in Irma July 28-August 2

The TB X-Ray Clinic will be held in the Irma Legion Hall commencing Thursday, July 28 at 2 p.m. until noon, Tuesday, August 2.

You will receive your appointment cards about a week before the clinic arrives. Please try to keep your appointment to avoid confusion, but if you are unable to keep your appointment or have not received a card, come anyway. It is important to the well-being of our community that everyone receives a TB Chest X-Ray.

MOBILE CHEST X-RAY UNIT TIME TABLE

Commence Operations at Irma:
July 28-200 p.m.-5:00 p.m.
July 29-9:00 a.m.-12 a.m.
July 30-9:00 a.m.-12:00 a.m.
2:00 p.m.-5:00 p.m.
August 1-9:00 a.m.-12:00 a.m.
12:00 p.m.-5:00 p.m.
August 2-9:00 a.m.-12:00 a.m.
Total 1,400.

Echo-Rodino News

Mr. and Mrs. Henry Vandervant and Mr. and Mrs. Ed Pock attended the Wainwright school meeting on June 26.

The children of the local schools are happy now the holidays are here. All the pupils of Rodino school were promoted. Mrs. Landers gave treats to her pupils as they were leaving along with promotion certificates to each. Tannis Beckett, Christina Beckett and Florence Landers passed with honors. David Thomas and Errol Beckett tied for high average again this year.

Mr. and Mrs. Tom Daniel of Kelowna are visiting with their relatives here.

Leland Garvie is working at the Red and White store in Kinsella for part of his holidays.

Don't forget the picnic, ball games and dance at Rodino grounds on July 13.

There will be a Bake Sale in Golka's Garage July 9, sponsored by Rodino W.A.

Jarrow News

Mrs. S. Helrich and wee daughter spent the week-end at the home of her parents, Mr. and Mrs. W. Orzechski. Eddie was also here from Moose Jaw.

Mr. and Mrs. Ambrose Firsiak have left for a trip to Wisconsin and other points where they will visit with his mother and relatives.

Mr. and Mrs. E. Radditz and family are here from Annapolis, Ont., visiting with Mrs. Radditz' parents, Mr. and Mrs. A. Carter and their families.

Frances Bovenkamp went to the city last week. From there he and his cousin Charles Lisson will go to Chilliwack, B.C. to visit with the Lissons, Bert Yakes and other friends.

Mr. and Mrs. A. Wolda and daughter are guests-at the Jamieson home.

Oleg Bruhaug is spending her holiday at home.

Mr. and Mrs. G. Rawluk have moved into their new modern house which has just been completed.

Leonard Owen is starting the erection of a new house on the former Arnold Christensen farm.

Mr. and Mrs. A. Murray and Barbara and Mrs. Murray's brother, Mr. McEellan of Vermilion, have been holidaying at Waterton Lakes and Banff.

Mr. and Mrs. L. Renwick of Three Hills have been visiting with relatives here.

Northern Nuggets

Get well wishes go this week to Misses Gloria Bars and Barbara Hardy who had their tonsils removed in Mannville hospital early in the week.

Miss Frances Bars was home over the July 1 week-end while Mrs. Edna Smith is spending this week with her mother Mrs. E. J. Jones. We understand that Miss Edith Jones is holidaying in the East with friends this month.

Mrs. W. H. Prior is enjoying the company of her sister Mrs. Hunter of Victoria, B.C., at present.

Miss Irene Meyer was home at the week-end. Her sister Kathryn, returned to Calgary with her.

Messrs. Coulman, Savage and Hinten attended an FUA convention in Wainwright on Monday.

Mr. and Mrs. Stanton Coulman had the company of their daughter Marjory and the Summerville family from Edmonton at the week-end.

Messrs. Edgar Jones and Red Larson, Archie Fleming and Stanley Bars were city visitors this week, as were Mr. and Mrs. R. Currie at the week-end.

Mr. and Mrs. Allan Larson, Mr. and Mrs. Art Pierce and Mr. and Mrs. Albert Firkus were on a fishing expedition to Crane Lake early this week.

Mrs. R. V. Prior and children are holidaying at Innisfail with the John Keller family.

Congratulations to Donald Lukens who completed grade 4 this year with 100 percent attendance. He received the prize of a knife at school closing.

The school picnic was held on June 30 as planned. The program given by pupils and teachers was much enjoyed while Mr. Frank Valer's record player and loud speaker really filled the bill. An outdoor stage had been erected for the program, which consisted of six or eight numbers all centered around the Jubilee theme. (Sorry we haven't a complete list.) All went well as the skies were clear and people used the drive-in idea to sit in their cars and watch the stage. Following the program Mr. J. B. Allen, Divisional Trustee, spoke a few words of appreciation on behalf of the Wainwright S.D. Treats, races and a picnic supper in the school completed a pleasant day, but we did wonder where, oh where, were all the oldtimers? At the dance held that evening, Mr. and Mrs. R. O. Larson took the prizes offered for oldest oldtimers present.

Work began at Albert school this week with big things being planned in the way of construction before fall.

Mrs. Ivan Currie, accompanied by her sister Mrs. Garcon, from Boston, Mass., is expected home on Wednesday this week.

Glen-Coa Gleanings

Congratulations to Mrs. Frank Goddard (nee Joan MacKay) on the birth of a son at Wainwright hospital on July 1st.

Misses Avis Satre and Norma Likens arrived home on July 1 to begin their three weeks holiday.

Mr. William Shaw of Edmonton was a week-end guest at the C. Gullbra home.

Rev. and Mrs. H. C. Satre and children left for Vancouver on Monday after more than a week visit with their relatives here.

Mr. and Mrs. Claydon and family of Edmonton visited Mr. and Mrs. Geo. Pedel over the long week-end.

Miss Pat Pedel also spent the holiday week-end with her parents.

The recent fine rains came just in time and were very much appreciated.

WITH THE District Agriculturist

By J. S. Duncan

Order Trees Now
Every year there are a lot of farmers who intend to order trees but leave it until it is too late and then find that there are no trees available or else only a few kinds which they don't want. The land for planting trees on next year should be being summerfallowed now so why not come in and fill out your application for trees while you are sure of getting them.

Weed Control
Probably no other part of farming is as expensive as weed control and yet in many cases farmers make sure that they will have a weed problem by neglecting to employ control measures along fences and roadsides. Most weeds can be kept in check and many can be killed by mowing or spraying these troublesome spots.

Another common mistake is to leave small patches of weeds untreated because they are too small to bother with. Because of this many weeds such as Tansy, Leafy Spurge, Hoary Cress and others get firmly established. It is easy and quite cheap to treat these small patches with Polytol Chlorate or Sodium Chlorate but it is difficult and expensive after the patches have spread out.

If you see a plant which is strange to you, have it identified because it may be a serious weed. Take the plant up, root and all, and take or send it in for identification. You can send specimens to this office, or to your elevator agent, or to the University of Alberta, or to the Alberta Department of Agriculture to have them identified.

Farm Women's Week
Monday, July 18 to Thursday, July 21 is Farm Women's Week at the Vermilion School of Agriculture and Home Economics.

A very worth while program has been arranged for these days. The cost for room and board is \$3.50 per day. No charge for children under 6 years, and over 6 years \$1.50 per day.

For detailed information and application forms contact your District Home Economist or District Agriculturist.

CHURCH SERVICES
SHARON LUTHERAN
Sunday, July 10
Sunday School and Bible Class 10 a.m.
Divine Worship 11 a.m.
L. Knudson, Pastor.

ST. MARY'S CHURCH NOTES
Service of Evensong will be held in St. Mary's Church on Sunday, July 10 at 2 p.m.

Card of Thanks
GRAHAM—Mrs. Nancy Graham and family wish to express their sincere gratitude for the kindness and sympathy shown them during their recent bereavement in the passing of their beloved mother and grandmother, Mrs. B. Hewitt. Thank you all. Nancy Graham and family.

Mrs. G. Fischer, Alice, Carol and Gordy are holidaying at Cooking Lake.

Our congratulations to the Misses Marjorie and Carol Matthews who have passed their grade II theory in the Royal Conservatory Academy of Music exams with honors. Also to Miss Isabel Inglis who has passed her grade IV music exams.

Best wishes for a happy holiday to the Youker family, Mrs. Geo. Youker, Mr. Chas. Youker, Mr. Kate, Irene and Claud who left on Monday morning on a six-week trip to P.E. Island.

Southern Sayings

Eddie, Lorna, Noreen and Arthur Jackson motored to Sedgewick last Sunday and visited at the home of Harry and Hazel Swanson.

Mr. and Mrs. Jim Toal and son Terry of Red Deer visited at the Jackson home last week.

J. Jackson is a visitor to Edmonton this week to take chiropractic treatments.

Peter Tindall has been staying at the home of his grandparents, Mr. and Mrs. P. Funk. Peter has a little brother now.

Next W.L. meeting will be held on Thursday, July 21 at the J. Jackson home. There will be a "pot luck" lunch. Roll call, bring a Grandmother or a Friend. Raffle. Mrs. Funk, Program committee is Mrs. T. Hill, Mrs. Bacon, Mrs. E. Jackson, Mrs. Creasy, Mrs. H. Long and Mrs. Cairns.

Mrs. Nellie Cairns was able to be home last Thursday on her day off from the Wainwright hospital.

Donation to the Alberta Protestant Home for Children in memory of Mrs. B. Hewitt from Mr. and Mrs. Leo Shaw and family.

News Items From Kinsella & District

Congratulations to Mr. and Mrs. Olive McBride on the birth of a daughter.

Mr. and Mrs. O. Olsenberg, Betty and Faye and Carol Swanson are spending a holiday with their daughter and son-in-law, Mr. and Mrs. Lyle Penner at Grande Prairie.

The pupils of Kinsella school primary classes held their end of term picnic at Camp Lake last Wednesday.

Mr. M. Wilkinson and Mrs. J. Wilkinson of Calgary renewed acquaintances with friends in Kinsella and district over the week-end. While here they were the guests of Mrs. R. Stevens.

The OORP held their annual installation of officers on Tuesday, the 28th. The newly installed officers are as follows:

Patron Honored Royal Lady—Mrs. W. Brown.
Honored Royal Lady—Mrs. C. Lancaster.

Associate Lady—Mrs. M. Rawluk.
Loyal Lady—Mrs. T. Oakes.
Leading Lady—Mrs. G. McGregor.

Secretary—Mrs. P. Mollier.
Treasurer—Miss B. Armitage.
Chaplain—Mrs. J. F. Murray.
Conductress—Mrs. A. Loades.
Historian—Mrs. H. G. Smith.
Pianist—Mrs. A. Firkus.

Inner Guard—Mrs. J. McKie.
Outer Guard—Mrs. W. Rawluk.
1 year trustee—Mrs. H. Whidden.
2 year trustee—Mrs. M. Bridgeman.
3 year trustee—Mrs. J. Harding.

Mrs. T. Hopfe and family of Viking were holidaying at the home of Mr. and Mrs. P. Mollier last week.

Ray Johnston spent the week-end at the home of his friend George Loades.

Mr. and Mrs. B. Wilkinson were visitors to the city last Thursday.

Week-end visitors from the city included: Mr. and Mrs. Harold Boyd and family, Mr. and Mrs. R. Baron, Miss A. Mulawka, Miss Rosie Berzecz and Mr. Nick Berzecz, from Sask. Mr. Tony Piwowar and friend.

Recent visitors at the home of Mr. and Mrs. A. Loades were Mr. and Mrs. Reg Ambler and family of Grande Prairie, Mr. and Mrs. Pat Ambler and family of Dawson Creek, Mr. and Mrs. H. Latimer and family of Kitchener, Ont., and Mr. and Mrs. T. Galuski of Edmonton.

Mr. and Mrs. E. Denison and

Local News

Mrs. J. Craig is a patient in Wainwright hospital.

Home on holidays are the Misses Doreen Simmermon and Shirley Enger.

Mrs. R. H. Dunlop of Indian Head, Sask., has been visiting at the home of her sister, Mrs. M. Enger.

Mrs. J. Ballentyne and Mr. D. H. Gunn are in Edmonton correcting Departmental Exams, grade IX and XII respectively.

Dairy business has become highly mechanized operation

Days of the sun-kissed milkmaid have passed and the dairy industry has become a mechanized business contributing nearly \$30,000,000 annually to Manitoba farmers.

Today dairying is big business with about 70 creameries operating in the province.

Six cheese factories are producing cheese for local consumption and for marketing in other western centres. Their products are popular, their outlets expanding.

Big production
Each year, Manitoba produces more than 1,000,000 pounds of milk—25,000,000 pounds of butter, 2,000,000 gallons of ice cream, 1,500,000 pounds of cheddar cheese and over 1,000,000 pounds of cottage and cream cheese.

As yet no condensed or evaporated milk is produced within the province but powdered skim milk is processed for local use and for export.

Long famous
Manitoba butter and cheese has long been famous as a prize winner at national fairs. About 98 percent of the butter produced in first grade and dairying experts are constantly working to perfect its quality and increase its quantity.

Cheddar is the principal product of Manitoba's cheese factories but in later years they have

presented a successful assortment of specialties, including Trappist.

Ready markets

Ready markets have been found for these from coast to coast.

The Red River district is the largest dairying area in the province.

However, Winnipeg, Springfield and Midlake regions are increasing production at a competitive rate.

Funny and Otherwise

The young bride proudly placed her first turkey on the Christmas table. "Ah that looks wonderful," said her husband. "What did you stuff it with?" "Stuff it! Why darning this one wasn't hollow."

Delivery boy: Here's the fish your mother ordered. It's G.O.B.
Little girl: You don't have to spell out for me—and anyway she ordered salmon.

The stage troupe had been reduced to playing in small towns. One of the players had quit and a rookie was put in his place. The manager was getting desperate. The financial situation was acute.

"I want you to go out there boldly," he admonished the youthful actor. "You're not afraid of that audience are you?"

"Certainly not," came back the protegee. "We got them outnumbered."

The late Thomas E. Edison had many peculiarities, one of which extended to the matter of biting help. He believed that prospective employees should pass some kind of written test. These were often tricky. Here is a sample:

"You are down to your last 10 dollars, and without prospect of getting more. You are playing poker with a stranger. He stays put on the first hand. After the draw you have three eights. There is fifty cents in the pot and the stranger bets a quarter. What would you do?"

One applicant simply wrote: "I do not play poker."

He got the job.

A farm couple taking in the sights of the nation's capital at night passed by the White House and the man stood for a minute looking the place over from one end to another.

The wife, expecting some wondrous remark, was startled when her spouse snorted: "Hmph! For a family of two they shore burn enough lights."

"You must drink hot water with your whiskey," the doctor told his patient, "otherwise you mustn't take it at all."

"But, how shall I get the water," queried the patient. "My wife won't let me have it for the whiskey punch."

"Tell her you want a shave," the doctor said.

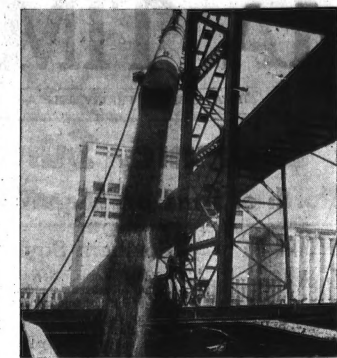

The next day the doctor called and asked the wife how the patient was. "He's clean mad," she replied. "He's shaving every ten minutes."

Two dairies were engaged in an advertising war. One company hired a racer to drive around town in a car with a large sign reading: "This devil drinks our milk."

The rival company came out with a sign twice as large: "You don't have to be a dare-devil to drink our milk."

A young woman, looking over a flat, was unable to decide whether her husband would like it.

"I shouldn't let that worry you," said the agent, "It's hard enough to get a new husband these days than a new flat."

CHURCH EXCURSION—Farmers on the special Saskatchewan Golden Jubilee excursion to Churchill from July 27 to August 1 may see some of their own wheat loaded into the hold of an ocean-going ship for transportation to the United Kingdom. Ship loading operations, as shown above, are only one of the attractions arranged for the Jubilee excursion. There are the Kettle Rapids on the Nelson River, Fort Prince of Wales, white whales, Indians, Eskimos and the army base at Churchill. According to W. J. Hansen, director of trade services, a large number of reservations for the trip already have been received. Reservations may be made with Mr. Hansen or by any Canadian National Railway agent.

Fashions

Great advances seen for cars next 10 years

The Bureau of National Affairs comes up with some startling predictions as to the motor car of 1965—possibly ten years away. The automobile will still be the leading means of personal transportation in 1965, says the bureau, but the motor car of that day will sport great advances over today's latest models.

For one thing, it's power plant will be smaller, lighter, quick to start, more efficient, and will deliver far more power on cheap fuel. Chances are it will be gas turbine, which derives its power from the action of expanding gas upon fan blades—rather than explosions against a piston. The turbine will open up an entire new range of horsepower, with considerations of safety, becoming the limiting factor.

The car's body will be lighter, too. It may be made of plastic that will bounce rather than dent, bringing savings in repair bills. Paints will be weather-proof, holding their color for years.

Garages won't be necessary. Some 1965 models will have sliding doors; polarized headlights that won't blind; stronger wind shields that support the roof without blind spots, repel dampness and eliminate the need for windshield wipers.

Cars will be lower, too, the bureau thinks, with the racing car's ability to take corners at high speed, safely. Auto tires will be good for a hundred thousand miles, and there will be the proper quota of extras, such as improved air-conditioning, power braking and power steering.

Well, that's your car of ten years from now. What'll it look like? That's anybody's guess. Saskatchewan Motorist.

Grasshoppers now hatching

Grasshoppers are now hatching in infested areas. It takes less time to kill them while they are hatching because at this time they are confined to smaller areas. It is therefore an economical practice to commence control measures with the first signs of hopper presence.

The grasshopper survey completed last fall in Alberta indicated a moderate infestation in the area north of the Chin-Barnwell line extending about 6 miles north of the Oldman river. A light infestation is expected from Camargay, Taber, Foremost, Bow Island and many other regions. In addition local infestations are likely in the Peace River country at such points as High Prairie, Falher, Eaglesham, Forts, Badreast, Worsley and Manning regions. The extent of the infestations will depend on weather conditions—the drier the spring and summer the greater the threat.

These figures would indicate a total population of approximately 120 moose, 218 elk and 918 deer, Mr. Paynter concluded.

Big game plentiful

REGINA—Big game animals are plentiful in the Moose Mountain area of southwest Saskatchewan, an aerial survey carried out by the game branch reveals.

Game commissioner E. L. Paynter in commenting on the project, which will aid game officials in setting hunting seasons and bag limits, said that while survey reports were not yet complete, indications were that big game numbers in the area were satisfactory.

Thirty-four moose, fifty-eight elk and 224 deer were actually sighted from transects flown one mile apart over the area. Because of thick brush, survey personnel were able to count only those animals within one-eighth of a mile of each side of the aircraft.

These figures would indicate a total population of approximately 120 moose, 218 elk and 918 deer, Mr. Paynter concluded.

Picnic meals can be just as nourishing as home meals

Now that the weather is nice it seems a pity to stay indoors for even a minute. So here is your excuse for getting outside. Plan a picnic. There are just two more things to be decided—the place and the food. You pick the place and as for the food here are a few tips from the home economists of the Consumer Section, Canada Department of Agriculture.

They suggest that in gathering together the makings for a picnic we try to make it as interesting and nourishing as a meal served at home. Chilled fresh fruit, crisp green vegetables, as well as hot foods make good eating along with the traditional fare of sandwiches, potato salad, hard cooked eggs, and pickles. Cheese also is a welcome addition to the picnic basket.

For a beverage nothing could be better than cold milk, either plain or chocolate. Or if you are going quite a distance, how about taking along some instant milk powder or frozen grape or other fruit juice concentrate. These can be mixed with fresh cold water at the picnic site.

One of the secrets of a varied picnic meal lies in the packing. Vegetables such as celery, carrot and green pepper sticks which

cut well in texture and flavor with sandwiches and eggs, will keep fresh in plastic bags. Kept on ice, they retain their crispness still better. Devilled eggs, sliced meat, chicken salad—in fact any cooked protein food made into sandwiches or packed in plastic should be kept cold, not merely cool. Even butter will stay firm if kept cold, and everyone can have fun making their own sandwiches. So keep this in mind when you are packing the food for your picnic.

If you have an insulated container for the food that should be kept cool you are all set, but if not, you can easily improvise one. A large cooking pot such as a preserving kettle with a lid makes an effective picnic "ice chest." Cover the bottom with a thick layer of crushed ice, then place the food in plastic bags or

No more red stripes on bacon packages

OTTAWA.—No more red stripes are to be used on bacon wrappers after June 30, it is announced by Hon. Paul Martin, federal health minister.

Commenting on the federal health department's decision Mr. Martin said the use of red stripes on various types of bacon packages was considered to be not in the interests of the consuming public. Purchasers could be misled as to the quality of the product when the stripe was used.

The matter was brought to the attention of the industry and with their co-operation June 30 was agreed upon for the replacement of red striped wraps by wraps containing no red lines.

During the first week in July officers of the federal government's Food and Drug division will be actively engaged in checking the retail market to ensure that striped wrappers are no longer in use.

Big game plentiful

REGINA—Big game animals are plentiful in the Moose Mountain area of southwest Saskatchewan, an aerial survey carried out by the game branch reveals.

Game commissioner E. L. Paynter in commenting on the project, which will aid game officials in setting hunting seasons and bag limits, said that while survey reports were not yet complete, indications were that big game numbers in the area were satisfactory.

Thirty-four moose, fifty-eight elk and 224 deer were actually sighted from transects flown one mile apart over the area. Because of thick brush, survey personnel were able to count only those animals within one-eighth of a mile of each side of the aircraft.

These figures would indicate a total population of approximately 120 moose, 218 elk and 918 deer, Mr. Paynter concluded.

MACDONALD'S

Canada's Standard Smoke

OUR COMPLETE SHORT STORY— BIG DEAL

By E. R. KARR

WALKING to his office this bright afternoon George King, the real estate magnate, passed a lot auction at which—as he would say modestly enough—his interests were to be expressed. But the immediate truth would come from the arrogant set of his face, which told you that his interests were confidently calculated to over-ride the interests of others.

Because George King considered it indecorous for a man of his position to be seen at a property auction and also very poor business since his presence would indicate to some people something special and thus cause the bidding to start high, he had arranged to be seen nowhere. As he looked about and listened to the rising bid, his anger grew until he thought savagely "Where could that fool Rosa be? He knows that I've got to have this lot. If he's not here in two minutes, I'll fire him."

Strong to see George King at a property auction, but practically a mirage also to see Tom Martin side up to him.

Unnoticed, Tom Martin said, "Hello, George. Long time no see." It was noticeable that he didn't offer his hand.

For a brief moment, brief as the shutting of a trap, George King's face lost its olympian composure.

"Hello, Tom," he said coldly. "I'm glad to see the young fellow you're about to society. By the way, did you happen to see Rosa any place?"

"Last saw Rosa coming out of his office about an hour ago."

Under his breath George King cursed his disappointment, listening carefully to the bid which had reached fifteen thousand dollars. He saw that the bidders were dropping out and that soon he himself would have to bid. He heard Tom Martin's cut laugh, voice.

Then his attention—demanding voice.

"Most people, except a few like you and the judge, thought that I'd pay my debt to society by making restitution, and since then doing so well in a perfectly legal

fashion that I seemed to get in some people's way."

"You shouldn't have turned me in, George," Tom Martin said evenly over his shoulder.

In silence, George King stared toward the auctioneer. Only two persons were now bidding at twenty thousand dollars.

George King turned a cold look on Tom Martin. "It was my only as a citizen to turn you in when I discovered you were wanted for a crime."

Again Tom Martin laughed curtly. "The ten months I did wasn't much, George, but long enough to keep me out of one of the biggest real estate deals this town's seen. Because I had the inside of the track on that deal you were so interested in. You weren't interested in turning a criminal in, George. You were interested in turning in a tough business competitor."

"Nonsense," George King retorted, then interposed with a defensive pride. "Since you couldn't know the extent of my interests in those so-called big deals, how do you know that you beat me?"

The auctioneer's voice rang out for a final bid. "Twenty-two thousand," George King said, ignoring Tom Martin and watching the faces turn toward him. Immediately a few who knew him jumped back into the bidding but dropped out again at twenty-five thousand, leaving only the man from whom he had originally taken the bid.

"Twenty-six thousand," George King said, thinking that by raising the bid a thousand dollars he would frighten out his opponent whose previous bid was four or five thousand above the ordinary value of the lot. But the other bidder was not frightened—not even at thirty thousand dollars. Nor at forty.

An intent silence had fallen on the crowd, as the people shifted their eyes between the bidders. Even those inexperienced in realty matters sensed the unusual. By the time the determined bidders reached seventy thousand dollars, which everyone recognized as a fantastic price, they were listened to with the awe ordinarily reserved for the great. Still the bid grew. Neither man showed signs of weakening, and the stimulated crowd began to release its excitement by cheering the bidders as if they were prizefighters. Indeed, both were as flushed as prizefighters. George King, intermittently touched his sleeve to his forehead, as his opponent repeatedly rubbed his face with a perspiration-soaked handkerchief. Finally at George King's bid of one hundred twenty thousand dollars his perspiring opponent, with a weak shrug of resignation, turned and walked away.

"Sold at one hundred twenty thousand," shouted the excited auctioneer, and the crowd roared its approval of George King.

Tom Martin, who had been watching the bidding in an amused silence, observed sarcastically, "Apparently you've struck a big deal, eh, George?"

The words found their mark. With a vicious snarl George King retorted, "What would you do if you were me and wanted the lot—let the other bidder buy?"

"Certainly," Tom Martin said quietly. "When I met Rosa before he took me to I'd heard anything about your attitude toward this lot. I said I'd heard from others that you were very much interested. Quite naturally, since everyone in the game knows he's your agent and he wanting to get you the lot as cheap as possible, he decided later to send in his place someone unknown. I see he sent the out-of-town agent who was with him when we met, the sweating guy from whom you won the bid. A big deal, eh, George?"

Paper by-product is dust layer

INTERNATIONAL P.A.L.L.S. Minn.—A paper by-product is the latest road-building product, says a United Press story.

An amber-colored liquid resulting during the manufacture of paper has been proved capable of preventing dust when sprayed on unpaved road surfaces. The liquid also proves useful as a binder for underbase gravel on roads to be paved, increasing the load-bearing strength of the surface, and in reclaiming the surfaces of bituminous roads.

Lignin and carbohydrates dissolved out of wood during the pulping process give the liquid its adhesive qualities, demonstrated here during tests last year.

Drive With Care!

Pay careful attention birds on the range

By E. R. KARR

Watch all the birds carefully while on the range and see that they are getting to the feeders. Place feed and water at some point away from the main flock for the timid birds. Many promoters follow the practice of putting feed and water on the outside roosts which assures that the timid birds are fed.

Range shelters should be moved quite often to new ground. If the pasture growth becomes too high, occasional moving will prove helpful. Long range growth is of little benefit to the birds since they are unable to digest fibre. Moving also lets the sunlight through to the ground and helps kill disease germs. The greatest food value to poultry on the range is in new growth.

Poultry ranges may be sown to either temporary or permanent pasture crops. Sometimes a combination of the two is used effectively. When this is done the two are run side by side. The range shelters and feeders are put on the temporary pasture and so located that the permanent pasture is not tramped out and killed around the shelters. Oaks, corn or rape make good crops for a temporary pasture. Sow in a series of light sowings so that there is a continuous crop of young succulent feed coming up. An alfalfa or broome mixture makes good permanent pasture and is advisable for increased yield and a better balanced diet.

Shade for the birds should also be provided. If trees or brush are not available, plant about three rows of sunflowers, close together, every 30 or 40 feet.

Restricted feeding on the range can also be practised to advantage. If birds are maturing too quickly, close the mash hoppers except for about an hour each morning and evening, and they will be forced to use more pasture and grain.

WATER SAFETY

Lakes and rivers often become polluted and dangerous for drinking or swimming purposes. It is a good idea for parents planning to take the family to a summer camp to find out from local health authorities whether the water is free from pollution and safe for the children to swim in. Water from pumps or wells at any resort season.

Mount Allenby, 8,500-foot peak in the Rockies, is noted for its fantastic price, they were listened to with the awe ordinarily reserved for the great. Still the bid grew. Neither man showed signs of weakening, and the stimulated crowd began to release its excitement by cheering the bidders as if they were prizefighters. Indeed, both were as flushed as prizefighters. George King, intermittently touched his sleeve to his forehead, as his opponent repeatedly rubbed his face with a perspiration-soaked handkerchief. Finally at George King's bid of one hundred twenty thousand dollars his perspiring opponent, with a weak shrug of resignation, turned and walked away.

"Sold at one hundred twenty thousand," shouted the excited auctioneer, and the crowd roared its approval of George King.

Tom Martin, who had been watching the bidding in an amused silence, observed sarcastically, "Apparently you've struck a big deal, eh, George?"

The words found their mark. With a vicious snarl George King retorted, "What would you do if you were me and wanted the lot—let the other bidder buy?"

"Certainly," Tom Martin said quietly. "When I met Rosa before he took me to I'd heard anything about your attitude toward this lot. I said I'd heard from others that you were very much interested. Quite naturally, since everyone in the game knows he's your agent and he wanting to get you the lot as cheap as possible, he decided later to send in his place someone unknown. Home Workshop

The design and construction of this sturdy lawn chair has been so simplified as to make it as easy for the amateur as the skilled craftsman. The pattern gives trac-

HEART-REST CHAIR: KEEPS FEET HIGH PATTERN 385

ing diagrams for cutting the side members from a board six feet long. There are no difficult measurements to make. Just trace, saw and assemble. Your neighborhood hobbyist with a hand or jig saw can cut out the shaped pieces and assemble them. The back rest adjusts to any angle desired from vertical to flat. Bolts may be used to take it apart for winter storage. Pattern 385 may be ordered separately for 35c or it will be included in the Porch and Terrace Furniture packet of five standard size patterns for \$1.50 postpaid.

CANARY CAGE PATTERN 432

As the parakeet cage made of dowels which was presented here some months ago has proven so popular with bird lovers this canary cage is offered as something equally attractive. Instead of the wire chrome-plated wire it is made of a hand-powered pin drill may be used for making the many holes for the wire. A small power drill would speed up the job. In addition to the actual-size layout for the holes and all shaped parts the pattern gives directions with sketches for making various accessories such as swings, drinking fountains but standard items available at shops selling pets and supplies may be used. Price of pattern 432 is only 35c.

Address order to: Department P.F.I., House Workshop Pattern Service, 4433 West Fifth Avenue, Vancouver, B.C.

New Banff museum boasts one of finest Indian exhibits

BANFF, Alta. — The pine-log Luxton Museum, officially opened here in mid-June contains what has been called one of the finest Indian and natural history exhibits on the continent.

The collection is largely a tribute by western Indians to Norman Luxton, one of western Canada's most colorful personalities. He is regarded by Indians of the plains as one of their greatest white friends.

Mr. Luxton, now 79, has known the Indians since childhood in upper Fort Garry. They were his first playmates. At 16 he was apprenticed to the Indian agent at Rat Portage, now Kenora, Ont.

Vigorous campaigner

During five years as publisher and editor of the Banff Gleaner and Canyon he campaigned vigorously for better land for the Stomies of the Rocky Mountains, and supported the Indian Association of Alberta in their fight for Indian rights.

During the years grateful Indians gave him the finest specimens of native handicraft along with curios handed down from their ancestors. The museum had its beginning in the Indian trading post which Luxton established early in the century as an outlet for Indian work.

Gradually, the building became full of articles of quill, fibre root, birchbark and clay pipes and woven baskets. There is an early 19th century looper, a perfectly preserved birchbark canoe, dozens of examples of tribal dress, horns from many animals, and a large collection of the mountain animals and birds of Canada, including the whooping crane and the now extinct passenger pigeon.

Cover wide range

Much of this finger work is enclosed in glass-covered cases, but larger exhibits—tom-toms, bows and arrows and brightly decorated shields—hang from the hewn-log beams of the ceiling.

One of the most striking exhibits is a diorama showing miniature Indians driving a herd of buffalo over a cliff to obtain winter meat.

There are dozens of pictures of great Indian hunters, chiefs, and tribal dancers of the Old West. Friends suggested that Mr. Luxton turn the building into a museum and a second building was added to house further exhibits.

"COW TREES"

"Cow trees" that grow in the tropical forests of Venezuela and Brazil yield a white nutritious sap that is almost indistinguishable from true milk. It can be drunk as it comes from the tree, used in cooking, or even made into whipped cream.

Weekly Tip

CUSTARD MAKING TIP

Custard will not curdle if the custard cups are put into a pan half filled with cold water instead of hot water. The custard will heat more gradually, will be firm and without a drop of whey.

Meaning of 'Canada' is old and controversial question

The meaning of the name "Canada" is an old and controversial question. There are several more or less reasonable derivations of the word suggested.

The Algonquin word "canata," meaning "welcome," is supposed to have been used by Indians when they first saw Cartier. There is the Spanish "canada," meaning "there is nothing here," which the Spaniards are likely to have used when they skirted the shores of the Gulf of St. Lawrence. Then there is the Portuguese word, "canada," meaning "narrow passage" and implying that the Portuguese long before Cartier's time sailed up the St. Lawrence and gave the name "Canada" to the country through which the comparatively narrow river (narrow above Quebec) flowed.

The Canadian Board of Geographical Names is inclined to think a more reasonable explanation is found in Cartier's report on his second voyage of exploration to these shores. In that report he mentioned the name came from William and Emery de Caen, who were in New France in 1621. The Biblical Canaan is also mentioned.

"There is another belief that the name came from William and Emery de Caen, who were in New France in 1621. The Biblical Canaan is also mentioned.

"It has been suggested, too, that Canada was an Indian proper name for which it is not possible to ascertain the meaning.

In respect to the old Portuguese word, "canada," meaning "strait," the board says that if explorers of that nation applied the word to the narrowing of the St. Lawrence at Quebec before Cartier's visit and if the Indians passed this word to Cartier, this is yet another theory advanced on the subject. However, it has never been established that the early explorers from Portugal covered the territory.

We know as much now as we are likely to know on this matter, and the Troque theory, backed by so substantial an authority as the Names Board, perhaps will come to be taken as the last word.

Rinse from human hands repels fish

VANCOUVER. — Buffalo are corralled by airplane and cattle are fenced by electricity. And fish may be rounded up or "trill-dived" by chemicals.

A team of workers here have discovered fish are repelled by water in which human hands have been rinsed.

Now the workers are trying to find out what is so repulsive about human hands.

Dr. David R. Idles of North Vancouver, head of the interested group, presented a paper on the subject.

When the chemical or repellent is discovered, and if it may be produced in quantity, it could be used to warn fish away from polluted water.

It could even be used, Dr. Idles said, to corral the fish or to guide them up ladders or away from turbines.

"We don't know yet what it is that halts the fish," he said. "But I think we should have it within two years."

"We tested the rinse from hands at a falls on Vancouver Island and it was certainly successful. "But we have to find out what it is from the hands that causes the reaction, and then produce it synthetically."

Dr. Idles presented his paper to the biochemical section of the Ninth Annual Conference of the B.C. Academy of Science at the University of British Columbia.

65 PERCENT OF SHIPPING

Crude oil and petroleum products, on a tonnage basis, account for about 65 percent of the United States shipping and 35 percent of the traffic on its inland waterways.

Metal used in making every Victoria Cross, Britain's highest military decoration, comes from the yards captured in the Crimean war.

Mustard-Pickle Dumplings

Mix and sift into a bowl, 1½ c. once-sifted pastry flour (or 1½ c. once-sifted all-purpose flour), 3 tsp. Magic Baking Powder, ½ tsp. salt. Cut in finely 2 lbs. chilled shortening. Make a well in dry ingredients and add ¼ c. finely-chopped mustard pickle in sauce and ¼ c. milk; mix lightly with a fork, adding milk if necessary, to make a dough. Drop in 6 portions, over hot cooked stew. Cover closely and simmer (never lifting the cover) for 15 mins. Yield—6 servings.

Always Dependable
